Cooler-zone gardeners are discovering that with a little wintertime care, plants that have long been considered "annuals" can thrive for years. These plants — including geraniums, gladioli, dahlias, begonias, rosemary, lavender, snapdragons, and even impatiens — aren't annuals at all. Rather, they are tender perennials. They aren't hardy enough to survive winter on their own, but they can be moved indoors during the cold months and then returned to the garden in spring. Many are even more beautiful in their second and third years! *Bulbs in the Basement, Geraniums on the Windowsill* is the first comprehensive resource on the care and maintenance of tender plants. In this zone-defying guide, you'll find simple techniques for overwintering, along with 160 detailed plant profiles that include individualized advice for overwintering and indoor care. With this practical guide, you can enjoy your favorite plants year after year, no matter where you live!
