Web Cartography (Geographic Information Systems Workshop)

Web Cartography (Geographic Information Systems Workshop)

Web Cartography (Geographic Information Systems Workshop)
Maps and atlases are created as soon as information on our geography has been clarified. They are used to find directions or to get insight into spatial relations. They are produced and used both on paper as well as on-screen. The Web is the new medium for spreading and using maps. This book explains the benefits of this medium from the perspective of the user, and the map provider. Opportunities and pitfalls are illustrated by a set of case-studies. A website accompanies the book and provides a dynamic environment for demonstrating many of the principles set out in the text, including access to a basic course in Internet cartography as well as links to other interesting places on the Web.

Professor Kraak looks at basic questions such as "I have this data what can I do with it?" and discusses the various functions of maps on the web. Web Cartography also looks at the particularities of multidimensional web maps and addresses topics such as map contents (colour, text and symbols), map physics (size and resolution), and the map environment (interface design/site contents).

Veda Howard:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library or even make summary for some e-book, they are complained. Just small students that has reading's heart or real their passion. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that examining is not important, boring in addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Web Cartography (Geographic Information Systems Workshop) can make you sense more interested to read.
