A Survey of Augmented Reality (Foundations and Trends(r) in Human-Computer Interaction) Mark Billinghurst, Adrian Clark, Gun Lee

A Survey of Augmented Reality summarizes almost fifty years of research and development in the field of Augmented Reality (AR). From early research in the 1960's until widespread availability by the 2010's, there has been steady progress towards the goal of being able to seamlessly combine real and virtual worlds. This monograph provides an overview of the common definitions of AR, and shows how AR fits into taxonomies of other related technologies. A history of important milestones in Augmented Reality is followed by sections on the key enabling technologies of tracking, display, and input devices. The author also reviews design guidelines and provides some examples of successful AR applications. The work concludes with a summary of directions for future work, and a review of some of the areas that are currently being researched. A Survey of Augmented Reality is an invaluable resource for researchers and practitioners. It provides an ideal starting point for those who want an overview of the technology and to undertake research and development in the field.

From reader reviews:

Rebecca Kurtz:

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get lot of stress from both daily life and work. So , whenever we ask do people have spare time, we will say absolutely yes. People is human not only a robot. Then we consult again, what kind of activity are there when the spare time coming to you actually of course your answer may unlimited right. Then ever try this one, reading guides. It can be your alternative throughout spending your spare time, typically the book you have read is A Survey of Augmented Reality (Foundations and Trends(r) in Human-Computer Interaction).

Lucille Chenier:

Many people spending their time period by playing outside using friends, fun activity with family or just watching TV the entire day. You can have new activity to invest your whole day by looking at a book. Ugh, you think reading a book really can hard because you have to take the book everywhere? It alright you can have the e-book, getting everywhere you want in your Cell phone. Like A Survey of Augmented Reality (Foundations and Trends(r) in Human-Computer Interaction) which is having the e-book version. So , try out this book? Let's find.

Floyd Alling:

This A Survey of Augmented Reality (Foundations and Trends(r) in Human-Computer Interaction) is brand-new way for you who has intense curiosity to look for some information as it relief your hunger associated with. Getting deeper you onto it getting knowledge more you know or else you who still having tiny amount of digest in reading this A Survey of Augmented Reality (Foundations and Trends(r) in Human-Computer Interaction) can be the light food for you because the information inside this book is easy to get simply by anyone. These books develop itself in the form and that is reachable by anyone, yeah I mean in the e-book contact form. People who think that in guide form make them feel tired even dizzy this reserve is the answer. So there is no in reading a publication especially this one. You can find what you are looking for. It should be here for a person. So , don't miss that! Just read this e-book style for your better life along with knowledge.

Stephen Mosley:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information from the book. Book is composed or printed or highlighted from each source that filled update of news. On this modern era like at this point, many ways to get information are available for a person. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just seeking the A Survey of Augmented Reality (Foundations and Trends(r) in Human-Computer Interaction) when you necessary it?
