All of Nonparametric Statistics (Springer Texts in Statistics)

Larry Wasserman

All of Nonparametric Statistics (Springer Texts in Statistics) Larry Wasserman
The goal of this text is to provide the reader with a single book where they can find a brief account of many, modern topics in nonparametric inference. The book is aimed at Master's level or Ph.D. level students in statistics, computer science, and engineering. It is also suitable for researchers who want to get up to speed quickly on modern nonparametric methods. This text covers a wide range of topics including: the bootstrap, the nonparametric delta method, nonparametric regression, density estimation, orthogonal function methods, minimax estimation, nonparametric confidence sets, and wavelets. The book has a mixture of methods and theory. From the reviews: '...The book is excellent.' (Short Book Reviews of the ISI, June 2006) 'Now we have All of Nonparametric Statistics … . the writing is excellent and the author is to be congratulated on the clarity achieved. … the book is excellent.' (N.R. Draper, Short Book Reviews, Vol. 26 (1), 2006) 'Overall, I enjoyed reading this book very much. I like Wasserman's intuitive explanations and careful insights into why one path or approach is taken over another. Most of all, I am impressed with the wealth of information on the subject of asymptotic nonparametric inferences.' (Stergios B. Fotopoulos for Technometrics, Vol. 49, No. 1., February 2007)

From reader reviews:

Richard McCain:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to know everything in the world. Each e-book has different aim or maybe goal; it means that e-book has different type. Some people truly feel enjoy to spend their time and energy to read a book. They are really reading whatever they take because their hobby will be reading a book. How about the person who don't like examining a book? Sometime, particular person feel need book after they found difficult problem as well as exercise. Well, probably you should have this All of Nonparametric Statistics (Springer Texts in Statistics).

Martha Skaggs:

As people who live in the modest era should be change about what going on or information even knowledge to make these people keep up with the era that is always change and move forward. Some of you maybe will certainly update themselves by reading through books. It is a good choice for you personally but the problems coming to anyone is you don't know which one you should start with. This All of Nonparametric Statistics (Springer Texts in Statistics) is our recommendation to help you keep up with the world. Why, as this book serves what you want and need in this era.

Sandra Spier:

Would you one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you find out the inside because don't judge book by its cover may doesn't work this is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer may be All of Nonparametric Statistics (Springer Texts in Statistics) why because the great cover that make you consider with regards to the content will not disappoint anyone. The inside or content is actually fantastic as the outside or even cover. Your reading sixth sense will directly make suggestions to pick up this book.

Leigh Brown:

Is it anyone who having spare time and then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This All of Nonparametric Statistics (Springer Texts in Statistics) can be the solution, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these guides have than the others?
