## **Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and Their Alloys** W. T. Elwell, D. F. Wood

Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and their Alloys focuses on methods for the analysis of titanium, zirconium, hafnium, niobium, tantalum, tungsten, and their alloys. Emphasis is on the procedures used in Imperial Metal Industries (Kynoch) Limited's laboratories for the analysis of these metals. These procedures include the oxide-resin procedure, solution procedure, and the point-to-plane spectrographic procedure.

Comprised of six chapters, this book begins with an overview of special procedures for obtaining representative samples, including the use of titanium or zirconium sponge (Kroll process) as well as titanium granules (ICI sodium process). Subsequent chapters discuss the identification of titanium and its alloys such as aluminum, boron, calcium, carbon, and copper by means of the point-to-plane spectrographic procedure, a Fuess metal spectroscope, and chemical spot-tests; spectroscopic analysis of zirconium, zirconium alloys, and ionide-refined hafnium; and spectroscopic analysis of niobium, tantalum, tungsten, and their alloys. This monograph will be useful for undergraduate students, educators, practitioners, and researchers in metallurgy.

### **From reader reviews:**

#### **Christine Curnutt:**

In this 21st one hundred year, people become competitive in every single way. By being competitive today, people have to do something to make all of them survive, being in the middle of the actual crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yeah, by reading a guide your ability to survive increases then having a chance to remain than other is high. For you who want to start reading the book, we give you that *Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and Their Alloys* book as a starter and daily reading publication. Why, because this book is greater than just a book.

#### **Patricia Kirby:**

Reading a book being a new life style in this season; every person loves to study a book. When you read a book you can get a wide range of benefit. When you read books, you can improve your knowledge, since a book has a lot of information on it. The information that you will get depends on what forms of book that you have read. If you need to get information about your exam, you can read education books, but if you want to entertain yourself you can read fiction books, these are novels, comics, along with soon. The *Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and Their Alloys* provide you with a new experience in studying a book.

#### **Salvador Perez:**

Reading is one of the sources of information. We can add our knowledge from it. Not only for students but in addition natives or citizens have to have books to know the revised information of year to be able to year. As we know those publications have many advantages. Besides we add our knowledge, could also bring us to around the world. With the book *Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and Their Alloys* we can have more advantage. Don't someone to be a creative person? To get a creative person must want to read a book. Merely choose the best book that suited with your aim. Don't possibly be doubtful to change your life by this book *Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and Their Alloys*. You can be more inviting than now.

#### **Ella Norman:**

Some people said that they feel bored stiff when they read a guide. They are directly felt that when they get a half part of the book. You can choose the particular book *Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and Their Alloys* to make your current reading is interesting. Your own personal skill of reading expertise is developing when you just like reading. Try to choose a straightforward book to make you enjoy you just read it and mingle the impression about book and studying especially. It is to be the first opinion for you to like to open up a book and go through it. Besides that the reserve *Analysis of the New Metals: Titanium, Zirconium, Hafnium, Niobium, Tantalum, Tungsten and*

Their Alloys can to be your brand new friend when you're experience alone and confuse with what must you're doing of their time.
