Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes

Interest in anaerobic digestion (AD), the process of energy production through the production of biogas, has increased rapidly in recent years. Agricultural and other organic waste are important substrates that can be treated by AD.

This book is one of the first to provide a broad introduction to anaerobic digestion and its potential to turn agricultural crops or crop residues, animal and other organic waste, into biomethane. The substrates used can include any non-woody materials, including grass and maize silage, seaweeds, municipal and industrial wastes. These are all systematically reviewed in terms of their suitability from a biological, technical and economic perspective. In the past the technical competence and high capital investment required for industrial-scale anaerobic digesters has limited their uptake, but the authors show that recent advances have made smaller-scale systems more viable through a greater understanding of optimising bacterial metabolism and productivity. Broader issues such as life cycle assessment and energy policies to promote AD are also discussed.

From reader reviews:

Nathan Marker:

Spent a free the perfect time to be fun activity to do! A lot of people spent their down time with their family, or their friends. Usually they doing activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Will you something different to fill your own free time/ holiday? Could possibly be reading a book could be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to try out look for book, may be the reserve untitled Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes can be great book to read. May be it can be best activity to you.

Patrick Duenas:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you never know the inside because don't evaluate book by its include may doesn't work at this point is difficult job because you are scared that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer could be Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes why because the fantastic cover that make you consider concerning the content will not disappoint you actually. The inside or content is usually fantastic as the outside or maybe cover. Your reading sixth sense will directly direct you to pick up this book.

Kimberly Hutton:

Is it a person who having spare time and then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes can be the response, oh how comes? The new book you know. You are and so out of date, spending your time by reading in this fresh era is common not a nerd activity. So what these textbooks have than the others?

Julia Watkins:

As we know that book is very important thing to add our information for everything. By a publication we can know everything we want. A book is a range of written, printed, illustrated or maybe blank sheet. Every year was exactly added. This e-book Bioenergy Production by Anaerobic Digestion: Using Agricultural Biomass and Organic Wastes was filled about science. Spend your time to add your knowledge about your research competence. Some people has different feel when they reading any book. If you know how big selling point of a book, you can experience enjoy to read a guide. In the modern era like today, many ways to get book you wanted.
