Global Climate Change and Human Health: From Science to Practice

Global Climate Change and Human Health: From Science to Practice

Learn the foundations of climate science and human health

Global Climate Change and Human Health examines the environmental crisis from a public health and clinical health perspective, giving students and clinicians the information they need to prepare for the future of health care. Edited by George Luber, associate director for climate change at the Centers for Disease Control and Prevention, and Jay Lemery, associate professor at the University of Colorado School of Medicine and section chief of Wilderness and Environmental Medicine in the Department of Emergency Medicine, and including chapters written by luminaries in the field, this landmark book provides a comprehensive introduction to climate change and health. Students will learn about climate changes direct effect on health, including extreme weather events, altered and degraded ecosystems, and threats to human security and welfare. Discussions on mitigation and adaptation strategies, including disease surveillance, communications, and greening health care, as well as a primer on the core concepts of climate change science are presented. Each chapter has a specific section on the clinical correlations of the impact of climate change on health. Informative illustrations depict increasing aeroallergens, shifting vector habitats, emergent risks, and more. Visual teaching materials broken down by chapter (including PowerPoint lecture slides) are available for instructors.

This book shows how human health will be —and already has been — affected and how health care practitioners need to start preparing.

- Understand the science behind climate change and climate variability
- Learn how the availability of food and clean water will affect public health
- Consider the diseases that will surge as vector populations swell
- Discover mitigation strategies targeted toward the health care community
- Understanding how climate change affects human rights and how international institutions are responding

Increased temperatures bring algal blooms that threaten clean water. Degraded air quality brings allergies, asthma, and respiratory diseases. Ground pollutants lower the nutritional value of food crops. It's clear that climate change is very much a public health concern, and *Global Climate Change and Human Health* helps those preparing to be on the front lines of health care.

From reader reviews:

Samantha Williams:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each reserve has different aim or maybe goal; it means that e-book has different type. Some people really feel enjoy to spend their a chance to read a book. They may be reading whatever they take because their hobby is reading a book. What about the person who don't like reading a book? Sometime, man feel need book if they found difficult problem or exercise. Well, probably you will need this Global Climate Change and Human Health: From Science to Practice.

Eric Sanders:

This Global Climate Change and Human Health: From Science to Practice book is not really ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this book incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. That Global Climate Change and Human Health: From Science to Practice without we understand teach the one who reading it become critical in pondering and analyzing. Don't end up being worry Global Climate Change and Human Health: From Science to Practice can bring when you are and not make your carrier space or bookshelves' turn out to be full because you can have it within your lovely laptop even cell phone. This Global Climate Change and Human Health: From Science to Practice having great arrangement in word and also layout, so you will not sense uninterested in reading.

Thomas Hill:

Reading a reserve can be one of a lot of action that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new information. When you read a reserve you will get new information because book is one of many ways to share the information or even their idea. Second, examining a book will make anyone more imaginative. When you reading through a book especially fictional works book the author will bring one to imagine the story how the people do it anything. Third, you can share your knowledge to other people. When you read this Global Climate Change and Human Health: From Science to Practice, you may tells your family, friends in addition to soon about yours book. Your knowledge can inspire average, make them reading a book.

Henry Buford:

Beside this particular Global Climate Change and Human Health: From Science to Practice in your phone, it could give you a way to get more close to the new knowledge or facts. The information and the knowledge you are going to got here is fresh through the oven so don't end up being worry if you feel like an previous people live in narrow commune. It is good thing to have Global Climate Change and Human Health: From Science to Practice because this book offers to you personally readable information. Do you sometimes have book but you don't get what it's about. Oh come on, that wil happen if you have this within your hand. The

Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss this? Find this book and also read it from right now!
