Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections

Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections

University teaching and learning has never been more innovative than it is now.

This has been enabled by a better contemporary understanding of teaching and learning. Instructors now present situated projects and practices to their students, not just foundational principles. Lectures and structured practice are now often replaced by engaging and constructivist learning activities that leverage what students know about, think about and care about.

Teaching innovation has also been enabled by online learning in the classroom, beyond the classroom and beyond the campus. Learning online is perhaps not the panacea sometimes asserted but it is a disruptively rich and expanding set of tools and techniques that can facilitate engaging and constructivist learning activities. It is becoming the new normal in university teaching and learning.

The opportunity and the need for innovation in teaching and learning are together keenest in information technology itself: Computer and Information Science faculty and students are immersed in innovation. The subject matter of these disciplines changes from one year to the next; courses and curricula are in constant flux. And indeed each wave of disciplinary innovation is assimilated into technology tools and infrastructures for teaching new and emerging concepts and techniques.

Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections describes a set of innovative teaching practices from the faculty of Information Sciences and Technology at Pennsylvania State University. Each chapter is a personal essay describing practices, implemented by one or two faculty that challenge assumptions and push beyond standard practice at the individual faculty and classroom level. These are innovations that instructors elsewhere may find directly accessible and adaptable.

Taken as a set, this book is a case study of teaching innovation as a part of faculty culture. Innovation is not optional in information technology; it inheres in both the disciplinary subject matter and in teaching. But it is an option for instructors to collectively embrace innovation as a faculty. The chapters in this book taken together, embody this option and provide a partial model to faculties for reflecting on and refining their own collective culture of teaching innovation.

From reader reviews:

Maria Jennings:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite e-book and reading a e-book. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections. Try to stumble through book Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections as your close friend. It means that it can to get your friend when you really feel alone and beside associated with course make you smarter than ever. Yeah, it is very fortuned for you personally. The book makes you considerably more confidence because you can know anything by the book. So , we need to make new experience as well as knowledge with this book.

Kevin House:

Often the book Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections will bring you to definitely the new experience of reading some sort of book. The author style to elucidate the idea is very unique. If you try to find new book to read, this book very suitable to you. The book Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections is much recommended to you to see. You can also get the e-book through the official web site, so you can quicker to read the book.

Lori Roth:

People live in this new moment of lifestyle always try to and must have the extra time or they will get lots of stress from both daily life and work. So , if we ask do people have extra time, we will say absolutely indeed. People is human not a robot. Then we request again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer will unlimited right. Then do you try this one, reading publications. It can be your alternative throughout spending your spare time, the book you have read is actually Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections.

Ingrid Baumbach:

Some individuals said that they feel fed up when they reading a book. They are directly felt this when they get a half parts of the book. You can choose often the book Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections to make your own reading is interesting. Your current skill of reading skill is developing when you like reading. Try to choose very simple book to make you enjoy to see it and mingle the sensation about book and examining especially. It is to be first opinion for you to like to open up a book and read it. Beside that the reserve Innovative Practices in Teaching Information Sciences and Technology: Experience Reports and Reflections can to be your friend when

you're experience alone and confuse with the information must you're doing of their time.
