The basic concept of this new edition remains unchanged: Emphasis is again put on a broader description of the general methods and processes for the synthesis, modification and characterization of macromolecules. These more fundamental chapters will be supplemented by 115 selected and detailed experiments. In addition to the preparative aspects the book also gives the reader an impression on the relation of chemical constitution and morphology of Polymers to their properties, as well as on their application areas. Thus, an additional textbook will not be needed in order to understand the experiments. The 4th edition nevertheless contains numerous changes: Chapter 1 and 2 are enlarged, 15 older examples have been replaced by new ones and background text is added. Suitable for students in organic and polymer chemistry as well as for chemists in industry who want to acquaint themselves with the theoretical and practical aspects of macromolecular chemistry. From the reviews: 'This is an excellent book for all polymer chemists engaged in synthesis research studies and education. It is educationally sound and has excellent laboratory synthetic examples. The fundamentals are well done for the teaching of students and references are reasonably up-to-date. As in previous issues, there are sections dealing with an introduction; structure and nomenclature; methods and techniques for synthesis, characterization, processing and modification of polymers.The authors have noted the following changes from previous editions- a new section on correlations of structure, morphology and properties; revision and enlargement of other property and characterization procedures; additional new experiments such as controlled radical polymerization; enzymatic polymerizations; microemulsions; and electrical conducting polymers. This is a high quality textbook at a reasonable price and should be considered as a suitable reference for all engaged in synthetic areas of polymer research.' (Eli M. Pearce)

From reader reviews:

Rodney Mitchell:

As people who live in the particular modest era should be upgrade about what going on or information even knowledge to make all of them keep up with the era that is certainly always change and move ahead. Some of you maybe may update themselves by looking at books. It is a good choice to suit your needs but the problems coming to a person is you don't know which you should start with. This Polymer Synthesis: Theory and Practice is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

David Giles:

You could spend your free time you just read this book this publication. This Polymer Synthesis: Theory and Practice is simple to create you can read it in the park, in the beach, train and also soon. If you did not have got much space to bring typically the printed book, you can buy typically the e-book. It is make you quicker to read it. You can save the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Mary Patterson:

As we know that book is vital thing to add our expertise for everything. By a book we can know everything we really wish for. A book is a list of written, printed, illustrated or even blank sheet. Every year was exactly added. This e-book Polymer Synthesis: Theory and Practice was filled about science. Spend your free time to add your knowledge about your research competence. Some people has various feel when they reading any book. If you know how big benefit from a book, you can truly feel enjoy to read a publication. In the modern era like currently, many ways to get book that you wanted.

Raymond Dixon:

That publication can make you to feel relax. This specific book Polymer Synthesis: Theory and Practice was bright colored and of course has pictures on there. As we know that book Polymer Synthesis: Theory and Practice has many kinds or genre. Start from kids until teens. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. Therefore not at all of book are generally make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading in which.
