## Metals in Cells (EIC Books)

Over the last three decades a lot of research on the role of metals in biochemistry and medicine has been done. As a result many structures of biomolecules with metals have been characterized and medicinal chemistry studied the effects of metal containing drugs.

This new book (from the EIBC Book Series) covers recent advances made by top researchers in the field of metals in cells [the “metallome”] and include: regulated metal ion uptake and trafficking, sensing of metals within cells and across tissues, and identification of the vast cellular factors designed to orchestrate assembly of metal cofactor sites while minimizing toxic side reactions of metals. In addition, it features aspects of metals in disease, including the role of metals in neuro-degeneration, liver disease, and inflammation, as a way to highlight the detrimental effects of mishandling of metal trafficking and response to "foreign" metals. With the breadth of our recently acquired understanding of metals in cells, a book that features key aspects of cellular handling of inorganic elements is both timely and important. At this point in our understanding, it is worthwhile to step back and take an expansive view of how far our understanding has come, while also highlighting how much we still do not know.

The content from this book will publish online, as part of *EIBC* in December 2013, find out more about the *Encyclopedia of Inorganic and Bioinorganic Chemistry*, the essential online resource for researchers and students working in all areas of inorganic and bioinorganic chemistry.

### **From reader reviews:**

#### **Terry Matlock:**

Have you spare time for any day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a move, shopping, or went to typically the Mall. How about open or read a book called Metals in Cells (EIC Books)? Maybe it is to become best activity for you. You understand beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have other opinion?

#### **Micheal McDonough:**

The e-book untitled Metals in Cells (EIC Books) is the book that recommended to you to learn. You can see the quality of the guide content that will be shown to you. The language that article author use to explained their ideas are easily to understand. The article writer was did a lot of exploration when write the book, therefore the information that they share to you personally is absolutely accurate. You also could get the e-book of Metals in Cells (EIC Books) from the publisher to make you much more enjoy free time.

#### **Ella Nebel:**

It is possible to spend your free time to read this book this e-book. This Metals in Cells (EIC Books) is simple to develop you can read it in the park, in the beach, train and soon. If you did not include much space to bring the printed book, you can buy the e-book. It is make you better to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

#### **Charles Parker:**

Is it an individual who having spare time and then spend it whole day through watching television programs or just laying on the bed? Do you need something totally new? This Metals in Cells (EIC Books) can be the respond to, oh how comes? The new book you know. You are therefore out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these textbooks have than the others?
