National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries Arnold and Mabel Beckman Center of the National Academies, Irvine, California, November 9-11, 2006 Conference, The National Academies

The 2006 conference, “Smart Prosthetics: Exploring Assistive Devices for the Body and Mind,” attracted scientists, engineers and medical researchers to participate in a series of task groups to develop research plans to address various challenges within the prosthetics field. Eleven conference task groups gave the participants eight hours to develop new research approaches to various challenges, including: build a smart prosthesis that will grow with a child; develop a smart prosthetic that can learn better and/or faster; refine technologies to create active orthotic devices; and describe a framework for replacing damaged cortical tissue and fostering circuit integration to restore neurological function. Representatives from public and private funding organizations, government, industry, and the science media also participated in the task groups. This book provides a summary of the conference task groups. For more information about the conference, visit the Smart Prosthetics conference site.

The National Academies Keck Futures Initiative was launched in 2003 to stimulate new modes of scientific inquiry and break down the conceptual and institutional barriers to interdisciplinary research. The National Academies and the W.M. Keck Foundation believe considerable scientific progress and social benefit will be achieved by providing a counterbalance to the tendency to isolate research within academic fields. The Futures Initiative is designed to enable researchers from different disciplines to focus on new questions upon which they can base entirely new research, and to encourage better communication between scientists as well as between the scientific community and the public. Funded by a \$40 million grant from the W.M. Keck Foundation, the National Academies Keck Futures Initiative is a 15-year effort to catalyze interdisciplinary inquiry and to enhance communication among researchers, funding agencies, universities, and the general public with the object of stimulating interdisciplinary research at the most exciting frontiers. The Futures Initiative builds on three pillars of vital and sustained research: interdisciplinary encounters that counterbalance specialization and isolation; the identification and exploration of new research topics; and communication that bridges languages, cultures, habits of thought, and institutions. Toward these goals, the National Academies Keck Futures Initiative incorporates three core activities each year: Futures conferences, Futures grants, and National Academies Communication Awards. For more information about the Initiative, visit www.keckfutures.org.

From reader reviews:

Ronnie Miller:

Inside other case, little persons like to read book National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries. You can choose the best book if you like reading a book. Given that we know about how is important a new book National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries. You can add know-how and of course you can around the world by just a book. Absolutely right, due to the fact from book you can learn everything! From your country until eventually foreign or abroad you will find yourself known. About simple point until wonderful thing you may know that. In this era, we can easily open a book or perhaps searching by internet system. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's study.

Ernest Bryan:

The book National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries give you a sense of feeling enjoy for your spare time. You can use to make your capable far more increase. Book can to be your best friend when you getting pressure or having big problem with the subject. If you can make reading through a book National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries to become your habit, you can get far more advantages, like add your current capable, increase your knowledge about many or all subjects. You are able to know everything if you like open and read a guide National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries. Kinds of book are a lot of. It means that, science publication or encyclopedia or others. So , how do you think about this book?

Michael Hale:

A lot of people always spent their own free time to vacation as well as go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity this is look different you can read any book. It is really fun for you. If you enjoy the book that you simply read you can spent 24 hours a day to reading a reserve. The book National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries it is very good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to create this book you can buy the actual e-book. You can m0ore quickly to read this book from the smart phone. The price is not too expensive but this book has high quality.

Dixie Jones:

As a student exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries can make you truly feel more interested to read.
