Mechanisms of OECD Governance: International Incentives for National Policy Making

Mechanisms of OECD Governance: International Incentives for National Policy Making

This book is devoted to the analysis of the Organization for Economic Co-operation and Development (OECD) and its role in international and national policy making. On its 50th anniversary, the OECD enjoys widely acknowledged international standing. Despite this, it has so far remained a rarely researched and analyzed organization. *Mechanisms of OECD Governance* is thus a pioneering work: it fills a long-overdue gap in presenting a theoretically guided and empirically rich analysis of the OECD as a political actor, and explores its role in political processes through various case studies in a variety of policy fields. By conceptualizing the contributions to this volume around the concept of mechanisms of governance, the book explores how and to what extent the OECD provides international incentives for national policy making.

The volume collects a set of ten contributions on the OECD and its activities in core fields of its commitment as an 'economic organization', such as economic and labor market policy, tax issues, finance or financial crime, but also in complementary fields in which the organization is active today despite its original economic focus, such as education, biotechnology, health, family issues, and migration. The case studies presented in this volume are an interdisciplinary collection from different academic perspectives, including political science, international relations, law, and organization studies. *Mechanisms of OECD Governance* provides a current and wide-ranging analysis of this organization including its constraints and opportunities in policy making.

Patrick Stokes:

People live in this new time of lifestyle always attempt to and must have the extra time or they will get wide range of stress from both way of life and work. So , when we ask do people have time, we will say absolutely indeed. People is human not really a huge robot. Then we consult again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative in spending your spare time, the actual book you have read will be Mechanisms of OECD Governance: International Incentives for National Policy Making.

Donna Robinson:

As a pupil exactly feel bored to reading. If their teacher requested them to go to the library or even make summary for some book, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Mechanisms of OECD Governance: International Incentives for National Policy Making can make you sense more interested to read.
