Beginning Algebra with Applications & Visualization (3rd Edition)

Gary K. Rockswold, Terry A. Krieger

Beginning Algebra with Applications & Visualization (3rd Edition) Gary K. Rockswold, Terry A. Krieger

The Rockswold/Krieger algebra series fosters conceptual understanding by using relevant applications and visualization to show students why math matters. It answers the common question “When will I ever use this?” Rockswold teaches students the math in context, rather than including the applications at the end of the presentation. By seamlessly integrating meaningful applications that include real data and supporting visuals (graphs, tables, charts, colors, and diagrams), students are able to see how math impacts their lives as they learn the concepts. The authors believe this approach deepens conceptual understanding and better prepares students for future math courses and life.
