## C Food: A Cookbook for Geeks and Nerds Stephen Miller

The **C Food** System has been created to facilitate the production of edible meals by Geeks and Nerds, especially Programmers. Careful compilation of the functions contained in this manual will result in dinners that you will be proud to serve to family, guests, maybe even someone you're trying to attract (or keep in your life!)

There are benefits in the **C Food** System for every segment of Society:

**Geeks:** There are too many things in the kitchen that you just don't understand. Well, no promise that we can fix ALL of that, but this is a start. You'll be turning out edible food in no time!

**Nerds:** You can figure out anything. This volume simply puts it in a syntax that you can relate to.

**The Amish:** OK, not the Amish. Nor any other segment of society that chooses to reject technology. I'm cool with that. We should have lunch. We could talk about gardening. Or the weather.

**Mothers:** Are you worried that your wonderful son who just got his first job as a software engineer will starve without access to his alma mater's food service? Is he too far away for you to cook for him? **Fear not!** The **C Food** Food Enhancement System puts recipes in a language he understands (even if you don't). He'll eat well and maybe even get a date!

**Fathers:** Do you REALLY care? Just get the money pit out of your house...

**Everyone else:** C'mon, there are a lot of elements at play here. We've got humor, pathos (OK, not a lot of pathos), melancholy (again, not a lot) and delight (hopefully a bunch!) You might have to read some of these recipes through a few times (and/or learn a little programming), but you'll get it eventually! I mean, this stuff is EASY! What's wrong with you? Why can't everyone do this?

Recipes as C++ functions, written in a form that any self-respecting geek or nerd will be sure to understand. This book contains a couple of silly recipes (including the Time Warp Cocktail) and lots of advice in not so down-to-earth language. Hey, buy a book, feed a Nerd!
