One of the most controversial atomic projects of the US nuclear industry during the 1960s and 1970s was the construction of a nuclear power plant at Diablo Canyon, a relatively unsettled and biologically rich part of the central California coast. *Conservation Fallout* traces the course of opposition that tore apart local communities, almost destroyed the Sierra Club, and attracted massive demonstrations in San Francisco and at the plant itself. The result is a balanced examination of nuclear politics in California and of the evolution and strategies of little-studied grassroots protest groups determined to resist the spread of nuclear technology.
