Nancy G. Leveson

Engineering a Safer World: Systems Thinking Applied to Safety (Engineering Systems) Nancy G. Leveson

Engineering has experienced a technological revolution, but the basic engineering techniques applied in safety and reliability engineering, created in a simpler, analog world, have changed very little over the years. In this groundbreaking book, Nancy Leveson proposes a new approach to safety -- more suited to today's complex, sociotechnical, software-intensive world -- based on modern systems thinking and systems theory. Revisiting and updating ideas pioneered by 1950s aerospace engineers in their System Safety concept, and testing her new model extensively on real-world examples, Leveson has created a new approach to safety that is more effective, less expensive, and easier to use than current techniques. Arguing that traditional models of causality are inadequate, Leveson presents a new, extended model of causation (Systems-Theoretic Accident Model and Processes, or STAMP), then shows how the new model can be used to create techniques for system safety engineering, including accident analysis, hazard analysis, system design, safety in operations, and management of safety-critical systems. She applies the new techniques to real-world events including the friendly-fire loss of a U.S. Blackhawk helicopter in the first Gulf War; the Vioxx recall; the U.S. Navy SUBSAFE program; and the bacterial contamination of a public water supply in a Canadian town. Leveson's approach is relevant even beyond safety engineering, offering techniques for "reengineering" any large sociotechnical system to improve safety and manage risk.

From reader reviews:

Robert Young:

The reserve with title Engineering a Safer World: Systems Thinking Applied to Safety (Engineering Systems) has a lot of information that you can learn it. You can get a lot of profit after read this book. That book exist new know-how the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you throughout new era of the the positive effect. You can read the e-book on your smart phone, so you can read that anywhere you want.

Ken Martin:

Do you have something that you like such as book? The guide lovers usually prefer to select book like comic, small story and the biggest you are novel. Now, why not trying Engineering a Safer World: Systems Thinking Applied to Safety (Engineering Systems) that give your enjoyment preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the means for people to know world much better then how they react towards the world. It can't be claimed constantly that reading habit only for the geeky particular person but for all of you who wants to end up being success person. So , for all you who want to start reading through as your good habit, it is possible to pick Engineering a Safer World: Systems Thinking Applied to Safety (Engineering Systems) become your personal starter.

Jane Rich:

As we know that book is essential thing to add our expertise for everything. By a reserve we can know everything we would like. A book is a list of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This publication Engineering a Safer World: Systems Thinking Applied to Safety (Engineering Systems) was filled concerning science. Spend your spare time to add your knowledge about your scientific research competence. Some people has different feel when they reading the book. If you know how big good thing about a book, you can really feel enjoy to read a publication. In the modern era like today, many ways to get book you wanted.

Jack Bell:

Do you like reading a book? Confuse to looking for your best book? Or your book seemed to be rare? Why so many problem for the book? But just about any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but novel and Engineering a Safer World: Systems Thinking Applied to Safety (Engineering Systems) or even others sources were given expertise for you. After you know how the truly amazing a book, you feel desire to read more and more. Science book was created for teacher or maybe students especially. Those ebooks are helping them to add their knowledge. In different case, beside science reserve, any other book likes Engineering a Safer World: Systems Thinking Applied to Safety (Engineering Systems) to make your spare time far more colorful. Many types of book like this one.
