Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century Delia Neuman

The amount and range of information available to today's students—and indeed to all learners—is unprecedented. Phrases like “the information revolution”, “the information (or knowledge) society”, and “the knowledge economy” underscore the truism that our society has been transformed by virtually instantaneous access to virtually unlimited information. Thomas Friedman tells us that “The World Is Flat” and that we must devise new political and economic understandings based on the ceaseless communication of information from all corners of the world. The Bush administration tells us that information relating to the “war on terrorism” is so critical that we must allow new kinds of surveillance to keep society safe. Teenage subscribers to social-computing networks not only access information but enter text and video images and publish them widely—becoming the first adolescents in history to be creators as well as consumers of vast quantities of information.

If the characteristics of “the information age” demand new conceptions of commerce, national security, and publishing—among other things—it is logical to assume that they carry implications for education as well. In fact, a good deal has been written over the last several decades about how education as a whole must transform its structure and curriculum to accommodate the possibilities offered by new technologies. Far less has been written, however, about how the specific affordances of these technologies—and the kinds of information they allow students to access and create—relate to the central purpose of education: learning. What does “learning” mean in an information-rich environment? What are its characteristics? What kinds of tasks should it involve? What concepts, strategies, attitudes, and skills do educators and students need to master if they are to learn effectively and efficiently in such an environment? How can researchers, theorists, and practitioners foster the well-founded and widespread development of such key elements of the learning process?

This book explores these questions and suggests some tentative answers. Drawing from research and theory in three distinct but related fields—learning theory, instructional systems design, and information studies—it presents a way to think about learning that responds directly to the actualities of a world brimming with information. The book is grounded in the work of such key figures in learning theory as Bransford and Anderson & Krathwohl. It draws on such theorists of instructional design as Gagne, Mayer, and Merrill. From information studies, it uses ideas from Buckland, Marchionini, and Wilson (who is known for his pioneering work in “information behavior”—that is, the full range of information seeking and use). The book breaks new ground in bringing together ideas that have run in parallel for years but whose relationship has not been fully explored.

From reader reviews:

Susan Metcalf:

Do you certainly one of people who can't read gratifying if the sentence chained within the straightway, hold on guys this kind of aren't like that. This Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century book is readable by you who hate the straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving perhaps decrease the knowledge that want to give to you. The writer regarding Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the articles but it just different available as it. So , do you nonetheless thinking Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century is not loveable to be your top listing reading book?

Erin Mohammad:

Nowadays reading books be than want or need but also get a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The data you get based on what kind of book you read, if you want send more knowledge just go with education and learning books but if you want feel happy read one along with theme for entertaining like comic or novel. The actual Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century is kind of e-book which is giving the reader unpredictable experience.

Wendy Poston:

Do you have something that you prefer such as book? The guide lovers usually prefer to opt for book like comic, limited story and the biggest some may be novel. Now, why not striving Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century that give your enjoyment preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the opportunity for people to know world much better then how they react in the direction of the world. It can't be mentioned constantly that reading habit only for the geeky person but for all of you who wants to end up being success person. So , for all of you who want to start reading through as your good habit, you may pick Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century become your current starter.

Mark Garcia:

You may get this Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century by visit the bookstore or Mall. Just viewing or reviewing it could to be your solve challenge if you get difficulties to your knowledge. Kinds of this e-book are various. Not only simply by written or printed but additionally can you enjoy this book by simply e-book. In the modern era like now,

you just looking by your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose right ways for you.
