Biochips as Pathways to Drug Discovery (Drug Discovery Series)

Biochips as Pathways to Drug Discovery (Drug Discovery Series)

In the fiercely competitive pharmaceutical marketplace, your organization cannot afford to spend excess dollars developing drugs that will fail to get FDA approval or have profoundly poor characteristics. **Biochips as Pathways to Drug Discovery** takes a comprehensive look at how the industry faces these challenges, using new technologies such as biochips to reduce the cost of drug discovery and improve drug safety. The book explores the tools and skills required at each step of the discovery process when using biochips to determine biological outcomes.

The authors provide an in-depth review of the clinical and pharmacogenomic relevance of biochips, ChIP-chip assays, and high-throughput approaches. They discuss how biochips are used to develop biomarkers in the drug discovery process, primarily for gene expression profiling and Single Nucleotide Polymorphism (SNP) analysis. The book includes coverage of experimental theory, quality control, clinical laboratory sampling considerations, database concepts, industrial laboratory design, and the analysis of the resultant large data sets. It discusses the application of biochips to the study of malaria, toxicogenomics, and SNPs, as well as intellectual property and market overviews. The book concludes with a comprehensive overview of how these chips are employed from early target discovery through preclinical toxicology and on through to pharmacogenomic and proof of concept studies in humans.

Written in an easily accessible style, the breadth of coverage introduces the subject to those new to the field, while the depth of coverage forms a foundation for future work. The book gives you the knowledge required to leverage the technology into bona fide discoveries.

Daniel E. Levy, editor of the *Drug Discovery Series*, is the founder of DEL BioPharma, a consulting service for drug discovery programs. He also maintains a blog that explores organic chemistry.

From reader reviews:

Gloria Pruitt:

In this 21st one hundred year, people become competitive in most way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the item for a while is reading. That's why, by reading a publication your ability to survive raise then having chance to remain than other is high. To suit your needs who want to start reading a new book, we give you this Biochips as Pathways to Drug Discovery (Drug Discovery Series) book as nice and daily reading publication. Why, because this book is greater than just a book.

Jon Estrada:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't judge book by its include may doesn't work is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer could be Biochips as Pathways to Drug Discovery (Drug Discovery Series) why because the amazing cover that make you consider in regards to the content will not disappoint you actually. The inside or content is actually fantastic as the outside or cover. Your reading 6th sense will directly make suggestions to pick up this book.

Cheryl Ruiz:

You may spend your free time you just read this book this publication. This Biochips as Pathways to Drug Discovery (Drug Discovery Series) is simple to bring you can read it in the area, in the beach, train and soon. If you did not have much space to bring the actual printed book, you can buy often the e-book. It is make you quicker to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Shawn Calvin:

Many people spending their moment by playing outside using friends, fun activity having family or just watching TV the whole day. You can have new activity to spend your whole day by examining a book. Ugh, do you consider reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Smartphone. Like Biochips as Pathways to Drug Discovery (Drug Discovery Series) which is finding the e-book version. So , try out this book? Let's notice.
